

Navigating Regulatory Affairs through Mergers & Acquisitions

Services for Life Sciences Companies

We help Life Sciences companies enable uninterrupted continued market access globally during mergers, acquisitions and divestitures. We also help develop and executive regulatory strategies to maintain appropriate product licenses with health authorities globally during and after the M&A transactions.

Regulatory is impacted by many cross-functional changes resulting from M&A

Legal Entity Integrations

Manufacturing Site Changes

Market Authorization Transfers

Certificate Updates

Legally Responsible Individual Changes

Legal Manufacturer Changes

Logo/Branding Changes

Process and System Impacts

How we support clients during the regulatory M&A lifecycle

Due Diligence	Regulatory Planning	Submission Execution	Manufacturing Cutover
<ul style="list-style-type: none">Assessment of submission documentation for compliance with global regulationsEvaluation of global product submission status to marketed inventory	<ul style="list-style-type: none">Developing and conducting regulatory assessmentsAnalyzing regulatory assessments to create supply continuity strategyGaining cross-functional alignment on supply continuity strategy	<ul style="list-style-type: none">Coordinating the creation of submission dossiersSupporting the creation of submission documentsTracking & communicating submission and approval status	<ul style="list-style-type: none">Reviewing and updating documentation for M&A related changes (e.g., invoices, CoA, etc.)Identifying any stock build requirements to support individual marketsCoordinating artwork review, change requests, translations and mock-up creation

Regulatory M&A – example client engagements

1

Supported a large divestiture of a global medical device and pharmaceutical company

- Performed impact analysis to identify country level submission and label change requirements
- Prepared regulatory and labeling implementation strategy with cross-functional alignment
- Supported creation of regulatory submission documents by market

2

Facilitated a carve-out of a top medical device manufacturer

- Analyzed the carve-out related changes (i.e. legal entity, branding, manufacturing sites) to determine the product labeling changes and regulatory submissions required
- Prepared detailed roadmaps and execution planning documents for the entire carve-out process

3

Led the separation of a leading diagnostics company

- Developed the product registration, labeling change, and ISO certification strategy for the separation of a leading IVD organization
- Organized and supported 'Day 1' readiness assessment process

4

Helped the acquisition of a medical and surgical product manufacturer for a global life sciences company

- Conducted a regulatory impact analysis to identify potential health authority submission requirements
- Developed regulatory strategies for 50+ markets to complete product registration transfers and updates
- Tracked overall progress and milestones related to regulatory submission preparation and approvals

Why KPMG?

We have extensive experience

Our teams have worked with clients across the life sciences industry, which means we bring deep experience and the 'so what' to each project

Tested approach and toolkits

Based on our experience we have developed toolkits and playbooks that accelerate our onboarding and enable us to drive impact immediately

Ability to scale

Our network of global professionals have the ability to quickly onboard to support fast moving acquisitions and divestitures
